

## Junior Energy Analyst – Monterrey, Mexico

Garrad Hassan provides a variety of consulting services to the wind energy business and is world renowned for its excellence and integrity in producing high quality independent engineering consulting services and due diligence reviews.

We are looking to recruit an entry-level energy analyst to our Energy and Development Services group in order to meet growing demand in our Mexico office based in Monterrey.

The primary function of this position will be to assess the wind resource and expected energy output of proposed and operational utility-scale wind farms in the growing Mexican and Latin American markets. Duties will include analysing wind and other climatic data, inspecting sites and measurement equipment, performing wind flow modelling, reviewing turbine site suitability, designing wind farm layouts, conducting statistical uncertainty analyses, and writing technical reports.

### Job Requirements: Essential

- Degree in relevant engineering, atmospheric science, or mathematics field;
- Strong analytical skills and innovative thinking;
- Excellent organizational and communication skills and an ability to work within a multidisciplinary team;
- Written and oral fluency in English and Spanish;
- The ability to work under commercial pressure.

Familiarity with wind energy industry software and measurement techniques would be an advantage but is not essential. The position will involve some site work and travel.

Applicants should be self-motivated and enjoy taking on challenges and responsibilities. Salary will depend on experience and background. The contract will be for 6 months and become permanent on successful completion the 6 month probationary period.

Closing date for applications: 31 October 2008.
